SUMMARY

Human-Computer Interaction & AI-Learning Experience Designer with a background in Computer Science and Psychology. Specialize in designing supportive AI-driven learning systems that bridge technical capabilities with user tool adaptation. Experienced in translating complex technical constraints into intuitive, user-centered educational and interactive tools.

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY, College of Architecture and Design, Atlanta, Master's of Industrial Design *May 2026*

- Master's Topic: Developed an AI-powered sketching application using a scaffolded approach to support users in learning sketching techniques and developing their creative skills. This approach took a combination of applying new technologies with traditional practices.

GEORGIA STATE UNIVERSITY, Atlanta, Bachelor of Science, May 2021

- Major: Computer Science ; Minor: Psychology

RELEVANT PROJECTS

AI-Powered Mental Sketching Model

- Designed and prototyped an AI-powered sketching application through a formal thesis-based research process. Integrated a reflective learning practice to enable human-AI collaborative workflows and enhance user skill acquisition and human agency.

Smart Fitness Mirror (European Product Design Award 2022) (FIT Award 2023)

- An interactive smart mirror designed to support and encourage healthy habit tracking through intuitive visual feedback.

EXPERIENCE

Georgia Institute of Technology, Atlanta, GA, Graduate Teaching Assistant / College of Computing *Jan 2023–May 2025*

- Designed and refined instructional materials to facilitate concept mastery in multiple subjects.
- Actively engaged in delivering key learning techniques to 30 CS, Psych, and NeuroSci students.
- Analyzed student performance data to iterate on curriculum design and improve learning outcomes.
- Evaluated student assignments and provided comprehensive, individualized feedback.

Georgia Institute of Technology, Atlanta, GA, Graduate Student Internship / University Housing *May 2023–Sep 2023*

- Synthesized complex stakeholder needs into actionable design requirements for physical and digital signage,
- Improving navigational experience for incoming students and their family.
- Led a team of 7 undergraduate students and supervised work reporting to management.
- Allocated resources across multiple facilities for maximum impact.

Fidelity Information Services (FIS), Jacksonville, FL, Product Support Rep 1 *May 2021–July 2022*

- Monitored high-volume derivatives trades within virtual desktop environments.
- Communicated critical financial data and trade status updates to high-profile clients, including CME and NASDAQ.
- Employed data visualizations using Microsoft Power BI to optimize internal reporting workflows.
- Administered enterprise user accounts and access privileges, maintaining security protocols for financial data systems.

SKILLS

Design & Research: User Experience (UX) Design, Prototyping, Research, Instructional Design, Cognitive Psychology.

AI & Technical: AI Prompt Engineering/Systems, Python, C++, Java, SQL, Data Visualization.

Certification: Georgia Tech Industrial Design Certification, Google AI Professional Certification.
